

FREE STANDING WALLS

FREE STANDING WALLS: Redi-Rock's freestanding blocks have textured faces on both sides of the block. Besides looking great and adding an aesthetic appeal to your property, these free standing walls also serve as guardrails or barrier walls to protect areas from errant traffic or other threats. They work great in parking lots when used with Redi-Rock's retaining wall system.

DIVIDER WALLS: When perimeter walls are needed, Redi-Rock is the answer. Our attractive Free-Standing blocks compliment any landscape and provide a solid solution. They can also double as seat walls.
